## DETAILED ACTION

### *Election/Restriction*

This application has been found to contain more than one invention. Therefore, restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 29-32, drawn to a process of preparing, classified in classes 546, subclass 152.
- II. Claims 33 and 34, drawn to multiple uses, classified in class 514, various subclasses.
- III. Claim 35, drawn to a method using an unknown additional active ingredient, classified in class 514, various subclasses.

These inventions are distinct, each from the other because of the following reasons:

These distinct inventions have acquired separate status in the art, will support separate patents, and will require different fields of search for the respective inventions. Accordingly, restriction for examination purposes as indicated is considered proper; 35 U.S.C. 121; 37 CFR 1.141; 37 CFR 1.142.

Inventions II and III are patentably distinct because Invention II does not require an additional active ingredient of its use.

Inventions I and II,III are unrelated because Invention I is drawn to a process of preparing.

Art Unit: 1625

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

In the event of an election of Group II or III, applicants are requested to elect a single disclosed method, i.e., a specific disease.

In the event of an election of Group III, applicants are also requested to elect a single disclosed mixture, i.e., compound plus specific active ingredient.

In, In re Weber, 198 USPQ 332, In re Hengehold, 169 USPQ 473, was noted for the proposition that as long as applicants have maintained the right (as they do here) to file the non-elected subject matter in divisional applications, then restriction is proper, as to that point.

Applicant may file the divisional subject matter noted in divisional applications. If applicant wishes a generic expression of the elected invention the claims here need be amended to reflect that election.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
